

Project Management Applications

Professional Development Training from State of Montana IT PMO and ESI International

Watch basic concepts come to life in this course, a comprehensive synthesis of core project management principles designed to reinforce skills learned throughout the core curriculum. Build on your new competencies and test your skills as you work in teams to complete an extensive, realistic, week-long project case study.

You'll propose, plan and execute a full-scale project under typical organizational constraints. Follow your project through the life cycle, resolving issues of performance, scheduling and control as you address questions of leadership and management. Each team member will take a turn as project manager, defining objectives and performing tasks and producing deliverables critical to the projects success.

Course Details:

Location: Mitchell Building, Room 13B
125 N. Roberts
Date: September 14-17, 2010
Time: 8:30 am – 4:30 pm
Length: 4 days
PDUs: 28

Government Tuition: \$1,150
Commercial Tuition: \$1,550

To register for this class and for more information, please visit

<http://pmo.mt.gov/Training>, or contact Scott Morris at (916) 419-3236 or Tammy Stuart with the State IT PMO at (406) 444-2471.

Learn how to:

- Select the level of staffing, resources, and management support required for a project
- Assemble a project team and gain commitment on project objectives
- Assign tasks based on work breakdown structure
- Estimate time and costs and present a project plan to team members and stakeholders
- Create a project binder documenting each stage of the project and lessons learned

REMINDER: This course integrates the knowledge, skills and competencies gained in the other ESI core PM courses. Having a foundation in industry standard PM practices is a vital component to your success in this course. Typically, this can be achieved by completing at least four ESI PM courses.
